

Measuring Safety Performance

Key Safety Indicators

When evaluating how well your safety efforts are performing, review your leading and lagging indicators. Leading indicators are the proactive steps you are taking to prevent injuries such as training your employees and holding regular safety meetings. Lagging indicators are reactive, such as the total number of injuries or total lost workdays, and show how effective your prevention efforts are.

The above evaluations and/or recommendations are for general guidance only and should not be relied upon for medical advice or legal compliance purposes. They are based solely on the information provided to us and relate only to those conditions specifically discussed. We do not make any warranty, expressed or implied, that your workplace is safe or healthful or that it complies with all laws, regulations or standards.
